

Product Information

UV-STYLO-X system is very simple, versatile and adaptable to different types of applications, anywhere control is required as for hygiene level in a deep manner owing to an all-around radiation of the surfaces.

Applied inside Air Conditioning System, especially in narrow spaces UV-STYLO-X helps to improve Indoor Air Quality (IAQ) eliminating the microbial load and the spreading and distribution of hazardous and annoying pathogens inside buildings.

IAQ increases in hotels, offices, patient rooms, schools, etc. and comfort level improvement comes together with less operative costs: a cleaner Air Conditioning System is also more efficient from an economic point of view with better heating, cooling and humidification performances.

As a matter of fact, using UVGI the need of maintenance operations and manual cleaning of inner surfaces is less necessary than usual.

With UV-STYLO-X you obtain a deep and continuous disinfection and cleaning of your Air Conditioning System, without the use of expensive and polluting chemicals, in few words with UV-STYLO-X you have better comfort for people in the building, saving money.

Selective UV-C Light	high efficiency, ozone free, pure quartz	- Hexagonal Frame in STAINLESS STEEL AISI 304
emission peak at 253.7 nm.		- All materials are tested for resistance to intense UVC rays
Powered by electronic ballasts		- UVLON PIPE sleeve (optional)
Certification		- CE mark (LVD - EMC - MD - RoHS)
